

Privacy Adptor for Wentworth and Corona passage sets. (Converts a passage set to a privacy function.)

Step 1: Check Parts List

Parts Supplied with the privacy adapter kit:

1. Outside plate (with Emergency release tab)
2. Inside plate (with privacy snib)
3. Spindle - choose size to suit door
4. Emergency Release Bar
5. Larger screws (2 of)

Parts to use from the Wentworth or Corona passage set:

6. Brass threaded posts (2 of)
7. Smaller screws (2 of)

Step 2:

Insert smaller screws into outside plate (use parts from passage set)

Step 3:

Attach brass posts to smaller screws (use parts from passage set)

Step 4:

Fit the outside plate onto the outside door face with brass posts inserted through the latch.

Step 5:

Insert larger screws into the inside plate as shown below.

Step 6:

Place inside plate on inside door face and secure screws into the brass posts.

Step 7:

Select spindle size to suit your door (2 size spindles supplied.)

Privacy Adptor for Wentworth and Corona passage sets.

Step 8:

Insert spindle through the latch and through to the outside plate.

Step 9:

On the outside plate, insert the emergency release bar all the way through to door so it is flush on the outside plate but also engages with the the inside plate

Step 10:

Secure the knob backplates by rotating them onto the inside and outside privacy plates. The knob backplates and the privacy plate have matching threads.

Step 11:

Check the privacy and emergency release functions:

When the door is snibbed from the inside, both inside and outside knobs are non operational (privacy mode).

When the knobs are in privacy mode, you can release the snib by toggling the emergency release tab on the outside plate.
